Bluebird Trail Report

This week, our hard working bluebird parents are busy feeding 277 hungry chicks. There are 86 nests and 43 eggs getting ready to hatch. Sixty-five more chicks have fledged and are flying around Innsbrook.

This week, the Bluebird Trail has some very sad news to report about the loss of one of our long time faithful monitors, Joyce Moran. Joyce passed away on May 1. She is survived by her husband and three children and their families. Her husband Bill will continue to monitor Joyce's bluebird trail in her memory, because it was so important to her. We offer the family our deepest sympathy and are so thankful for all of Joyce's efforts for our bluebirds.

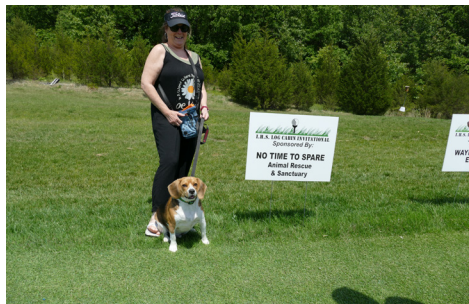

13th Annual IHS Golf Tournament

Mon., May 20 | 11 a.m. | GC

The roster is filling up more and more every day! There is still time to register groups of four and single players. Don't miss out on this fun event! For a \$90 entry fee, each player receives the round of golf and cart, lunch, beverages, chances to win prizes, and an after golf get-together. Plus, bid on pristine golf equipment available in the silent auction.

To get on the players roster and more tournament information, call Scott Francin at .636.489.9062. Proceeds from this event will go towards the IBK Historical Society's current project - the construction of the barn.

IBK Fishing Club Tips

Fishing in the wind can be both challenging and rewarding for anglers. It requires some technique. Strong winds and waves can push the smallest fish against the downwind shorelines. Bigger, stronger fish take advantage of their helpless brethren, feeding actively. Facing the challenges of controlling a boat and wind-affected casting, the angler also has to re-create natural conditions. Swimming lures against the wind is a sure sign to the feeding fish that something is amiss. The best bet is to cast parallel to a wind-blown shoreline. Let the waves and the wind push your lure as they do to the real bait fish.

Village of Innsbrook Board of Trustees Meeting

The Board of Trustees next regular meeting is Tuesday, May 14 at 5 p.m. at Charrette Creek Commons. All regular meetings are open for the public to attend until capacity is reached. A Zoom option is available for those who cannot attend in person at the Village of Innsbrook website: www.villageofinnsbrook.org.

This Saturday, May 11, from 1:30–4:30 p.m., is sure to be a fun afternoon for the whole family! IHS is hosting its annual Discovery Day at the Historic Village site. The pictured duo of Dave and Bryan will be entertaining us from the Log Cabin Porch. There will be a scavenger hunt for the kids with prizes, a blacksmith, a lady on a spinning wheel, and a couple showing how a log cabin is built using landscape timbers will also be demonstrating their skill. Complimentary hot dogs, ice cream, and refreshments will also be available. This is an event for ALL of Innsbrook. You do not need to be a member of the Historical Society. Just come out and enjoy the fun activities!

This above photo of the barn shows the recent placement of the first roof rafters. This important portion of the reconstruction is likely to take quite a bit of patience and planning skill. Fortunately, our all-volunteer crew is blessed with an abundance of both. If you haven't seen the barn work, stop by this Saturday at our Discovery Day Open House.

If you have questions about the IHS, don't hesitate to call Dave at 314.704.7001.

NATURE NOTES

Turtle Crossing

If you've been driving through the countryside lately, you may have noticed box turtles sharing the pavement. Spring rains and warm weather make this the season that box turtles wander. As they search for food and mates, these harmless land turtles must cross roads that pass through their home areas.

Turtles often spend decades within a small plot of ground, but sometimes they wander great distances. Biologists have used tracking devices to follow these traveling turtles. From one turtle's point of capture, he crossed roads, fields and backyards. He swam a creek and burrowed under a fence. When the biologists finally stopped following him, he had traveled more than six miles.

While most Missouri turtles live 15-30 years, box turtles can live 50 to 80 years, occasionally more than 100 years. They spend their quiet lives eating plants, earthworms and insects. Their shell provides a bony shield to protect them from most natural enemies. But cars needlessly kill thousands of turtles each year. In fact, cars are probably their biggest Cause of death. Next time you drive across the countryside, please be alert to avoid hitting these innocent travelers.

The Ornate Box Turtle

- Domed upper shell and a hinged lower shell. The upper shell is usually smooth or flattened along the top, without a ridge, and is normally brown with numerous yellow lines radiating from the center of each individual plate.
- The head and limbs are brown or black with yellow spots and blotches. There are normally four toes on each hind leg.
- It is a fairly common resident of Missouri's native prairies and grasslands, including pastures, open woods and glades.

COMMUNITY SPOTLIGHT

Girl Scout Troop 702 from Greentrails Elementary School in Chesterfield, geared up for a day of fishing at Innsbrook with the IBK Fishing Club. Rebecca Hillman, one of the troop's leaders and a neighbor, reached out to a member of the IBK Fishing Club for suggestions on a suitable fishing spot. The Fishing Club had recently received a set of 16 rods and reels from the Missouri Conservation Department's loaner program, and with some preparation, were ready to facilitate the girls' fishing experience. Kurt and Donna Kruger, alongside fellow club members John O'Toole, Ed Klevorn, and Chris and Anne Chivetta, were thrilled to introduce these young scouts to the joys of fishing at Innsbrook!
